

# SAAPO COIN White Paper

## 1. Introduction and Proposal

*SAAPO COIN was born as the backbone of the Jogada de Ouro ecosystem—a revolution in the worlds of sports, technology, and digital asset management. SAAPO stands for Sistema de Avaliação of Atletas Prodigiosos Online (Online System for the Evaluation of Prodigious Athletes), a proprietary technology based on artificial intelligence, predictive analysis, machine learning, and blockchain. Its mission is to discover, evaluate, classify, fund, and internationalize young promising football athletes worldwide.*

*Created to democratize access to professional football, the platform breaks down the barriers of luck, chance, and geographic limitations. Instead of relying on a scout randomly discovering a talent in an underserved area, SAAPO offers a scientific and scalable alternative: any young player, from anywhere in the world, can submit specific videos, be evaluated by AI, ranked globally, and tokenized.*

*By tokenizing top-performing athletes from the ranking, small, medium, and large investors can become digital shareholders in promising careers, reducing risks, eliminating bureaucracy, and maximizing financial returns. Unlike the traditional model where one agent owns the rights to a few players, SAAPO COIN holders can diversify and automate their participation in the success of thousands of talents simultaneously.*

*Jogada de Ouro, the program responsible for implementing this methodology, includes more than 100 scouts from clubs around the globe, connecting tokenized athletes directly to major international sports centers. SAAPO not only identifies talents but also prepares, structures, presents, and funds every stage of the athlete's journey—using advanced statistical data, non-contact evaluations, and a standardized global curriculum.*

*SAAPO is also a symbolic reference to the frog (sapo in Portuguese), an animal representing evolution and decisive leaps. Inspired by this concept, SAAPO uses machine learning to continuously learn from athletes' performance, behavior, and development data. This applied intelligence identifies hidden talents and accelerates their careers with real and structured leaps, turning potential into performance. SAAPO is therefore the bridge between origin and stardom—built on meritocracy and advanced technology.*

---

## 2. SAAPO as Cryptoasset and Technology

**SAAPO is not just a cryptocurrency — it is a technological system for athlete evaluation, tokenization, funding, and monetization, operating on three pillars:**

- SAAPO Platform: AI technology that evaluates athletes via video and technical data.
- SAAPO Token: The native cryptoasset powering the entire internal economy, used to buy/sell athlete tokens.
- Future SAAPO Blockchain: A proprietary network to support athlete tokenization, smart contracts, marketplace, and staking.

### **3. Tokenomics**

- Name: SAAPO COIN
- Symbol: SAAPO
- Standard: ERC20 (Ethereum)
- Decimals: 18
- Total Supply: 1,500,000,000 SAAPO (Fixed)
- Initial Circulating Supply: 0
- Access Type: None (free and decentralized access)
- Transfer Type: Unstoppable
- Smart Contract: Verified source code

#### **Initial Distribution:**

- 58% Public and Private Sale
- 20% Liquidity Fund and Exchanges
- 12% Team and Founders (locked)
- 5% Strategic Partnerships
- 5% Institutional Reserve

## **Sale Phases:**

- **Private Presale (Phase 1)**

- Price: US\$ 0.02 per token
- Goal: Final tech funding
- Cap: US\$ 876,000
- Expected Adjustment: 3% per month until public launch

- **Public Sale (Phase 2)**

- Launch Price: US\$ 0.10 per token
- Potential Valuation: Up to 400% over Phase 1
- Estimated Date: Late 2025 / Early 2026

## **4. Internal Economy**

- Athlete tokens will initially be traded exclusively using SAAPO.
- Once listed on exchanges, SAAPO can be exchanged for any cryptocurrency or fiat currency.
- The system includes mechanisms to protect against volatility, with regular buyback and burn policies to control supply.

### **Automatic Buyback and Continuous Appreciation**

Part of the operational profits (from clubs, brands, sponsorships, or athletes' image rights) will be used to systematically buy back athlete tokens from the market—enhancing liquidity and value projection, even before athletes reach peak performance.

### **App and Rewards**

The SAAPO app will allow users to achieve engagement milestones (watching games, investing, sharing, evaluating videos, following athletes) and unlock financial rewards like SAAPO token bonuses.

## 5. Governance and Structure

**SAAPO COIN is managed by a solid and transparent structure with shared responsibilities among professionals in technology, sports, finance, and marketing:**

- **Fernando Padilha** – Founder & Development Director
- **Lucas Leite** – Founder & Marketing Director
- **Efraim Marques** – Co-founder, CEO & Internationalization Director
- **Eduardo Rocha** – Co-founder & Finance Director
- **Beatriz Klink** – Network & Technology Manager

**The company is registered in Brazil under CNPJ 49.792.933/0001-58, established on 03/03/2023, with active legal and fiscal compliance.**

---

## 6. Conditions for Official Launch

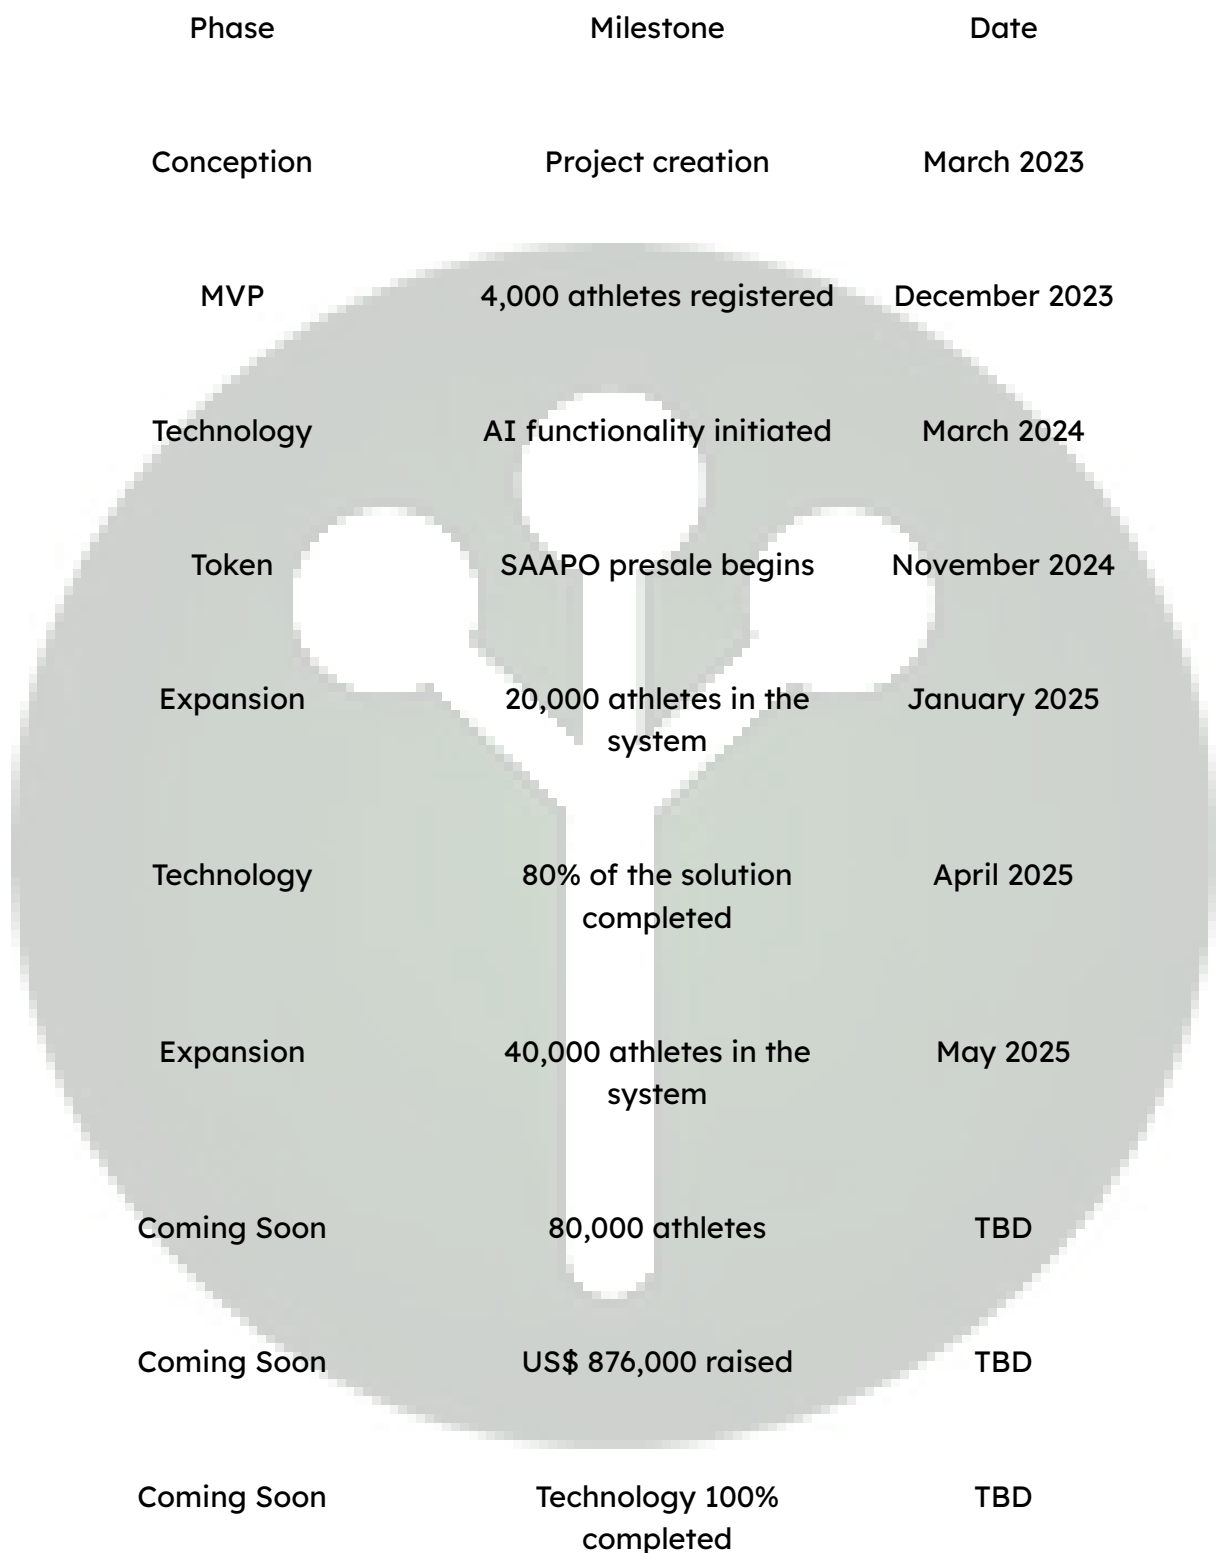

**The final launch of the platform, app, blockchain, and 200 athlete tokens depends on two milestones:**

- 100,000 athletes registered in the system
- US\$ 876,000 raised during the presale

**Current Status (as of 05/13/2025):**

- Registered Athletes: 39,778
  - Amount Raised: US\$ 39,845
-

## 7. Roadmap

Coming Soon

100,000 athletes in the  
system

TBD

Launch

Main event and 200 token  
launch

TBD

International

Jogada de Ouro Europe

TBD

International

Jogada de Ouro USA

TBD

International

Jogada de Ouro Asia

TBD

## 8. Final Considerations

SAAPO COIN emerges as a technological, meritocratic, and decentralized response to inequality in sports opportunities. By combining innovation with social impact, it transforms dreams into data—and data into accessible, secure, and scalable capital.

Investing in SAAPO means investing in the future of sports, the democratization of talent, and the transformative power of blockchain.
